Objective

Enthusiastic MCA graduate aspiring to start a career as a Python Backend Developer. Skilled in Python, Django, REST APIs, PostgreSQL, Git, and backend application development. Eager to leverage problem-solving abilities and software development knowledge to build reliable, secure, and scalable applications while continuously learning modern backend technologies.

Technical Skills

- Programming Languages:** Python, SQL
- Backend Development:** Django, Django REST Framework (DRF)
- Database:** PostgreSQL, SQLite
- API Development:** REST APIs, JSON, Postman
- Web Technologies:** HTML, CSS(basic)
- Version Control:** Git, GitHub
- Tools:** VS Code, Postman
- Concepts:** OOPs, DBMS, Authentication, CRUD Operations, Data Structures
- Deployment Basics:** Render

Education

Master of Computer Application	2023 – 2025
<i>University Institute of Technology-RGPV, Bhopal, MP</i>	<i>CGPA: 7.10</i>
Bachelor of Computer Application	2019 – 2022
<i>Devi Ahilya Vishwavidyalaya, Indore, MP</i>	<i>74.9%</i>
Class XII (CBSE)	2019
<i>JNV, Khandwa</i>	<i>69.8%</i>
Class X (CBSE)	2017
<i>JNV, Khandwa</i>	<i>CGPA: 8.0</i>

Projects

Sharanam Self Study Center Library Management System 🔄
– Developed a complete Library Management System for managing student registration, authentication, attendance tracking, seat booking, payment monitoring, and notifications. – Implemented secure login/logout functionality and role-based access control using Django Authentication. – Designed and managed relational database models using Django ORM and SQLite. – Built responsive dashboards for students and administrators with real-time data management. – Integrated attendance, fee tracking, seat allocation, and notification modules to streamline library operations. – Tech Stack: Python, Django, SQLite, HTML, CSS, JavaScript, Bootstrap, Git, GitHub, Render
Smart Inventory Management System 🔄
– Developed a full-stack inventory management web application to manage products, categories, suppliers, and inventory records efficiently. – Implemented secure user authentication, role-based access control, and session management using Django Authentication. – Built CRUD functionalities for products, categories, suppliers, and stock transactions using Django ORM. – Designed and optimized relational database models with Foreign Key relationships for inventory tracking and management. – Developed stock-in/stock-out management, low-stock alerts, search, filtering, and dashboard analytics features. – Integrated responsive user interfaces using Bootstrap and managed version control with Git and GitHub.

Certifications, Achievements & Strengths

Certifications	Achievements	Strengths
• Python Programming • Django Development • SQL & Database • Git & GitHub	• Built Multiple Django Projects • Developed REST APIs • Solved 200+ Coding Problems • Active GitHub Portfolio	• Problem Solving • Backend Development • Quick Learner • Team Collaboration
