Indore, Madhya Pradesh

Summary

MCA graduate and aspiring Python Backend Developer & QA Enthusiast with hands-on experience in Python, Django, REST APIs, PostgreSQL, and database management. Familiar with Manual Testing, API Testing, Postman, and bug reporting. Seeking an opportunity to build scalable applications and ensure software quality through development and testing best practices. Seeking a Python Backend Developer opportunity to contribute to scalable web applications.

Skills

Languages: C,Python
Frameworks: Django
Databases: SQL
Web Basic: Html,Css
Backend & APIs: REST APIs , FastApi , Authentication , Authorization , CRUD Operations.
Testing Tools: Postman, API Testing , Jira.
Tools: Git, GitHub, VS Code , Render
Concepts: OOPs , DBMS , Data Structures and Algorithms , SDLC , STLC , Bug Reporting

Education

Master of Computer Applications (MCA)	2023–2025
University Institute of Technology, RGPV, Bhopal	CGPA: 7.10
Bachelor of Computer Applications (BCA)	2019–2022
Devi Ahilya Vishwavidyalaya, Indore	74.9%
Class XII (CBSE)	2019
Jawahar Navodaya Vidyalaya, Khandwa	69.8%

Projects

SELF STUDY- Sharnam Library Management System

🔗 Live Demo

- Developed a full-stack Library Management System using Python and Django to manage student registrations, attendance, seat allocation, fee tracking, and notifications.
- Implemented secure authentication, role-based access control, and responsive dashboards for students and administrators.
- Designed relational database models using Django ORM and SQLite, integrating CRUD operations, form validation, and search functionality.
- Deployed the application on Render and managed version control using Git and GitHub.
- Tech Stack:** Python, Django, SQLite, HTML, CSS, Bootstrap, Git, GitHub, Render.

GramSangam – Rural Resource Sharing & Agriculture Assistance Platform

🔗 Live Demo

- Developed a Django web application connecting farmers with equipment owners, transport providers, and agricultural workers.
- Implemented Equipment Rental, Worker Hiring, and Transport Booking modules with booking request and approval workflows.
- Built role-based authentication and dashboards for customers and resource owners using Django Authentication.
- Created an Education Hub featuring farming guides, government schemes, daily agricultural tips, weather updates, and mandi price tracking.
- Integrated weather forecasting using OpenWeather API and developed an AI-based farming assistance module for farmer support.
- Tech Stack:** Python, Django, SQLite, HTML, CSS, Bootstrap 5, OpenWeather API, Git, GitHub.

Certifications & Achievements

- Python Programming, Django Development, SQL & Database Management.
- AWS Course Completion , REST API With Python , GenAI With AWS
- Built multiple Django projects and developed REST APIs.
- Solved coding problems and maintained an active GitHub portfolio.
